

Model Number : F-24
Model Name : Fairchild

Model Type: Commercial Utility

Two-hundred Fairchild F-24's rolled off Texas Engineering and Manufacturing Company's (TEMCO) production line in a production program that began in 1946. The Fairchild Company furnished the engineering drawings and TEMCO, in turn, built the complete airplane including the detail parts. The F-24 was a three-place, commercial high-wing monoplane. Fairchild took delivery of the airplanes from the TEMCO plant, and flew them to their sales destinations from the adjoining U.S. Naval Air Station, Dallas, runway.

| Dimensions | |
|--|----------|
| Wingspan | 36.33 ft |
| Overall Length | 23.75 ft |
| Height | 7.33 ft |
| Weights and Capacities | |
| Empty Weight | 1463 lb |
| Gross Weight | 2500 lb |
| Useful Load | |
| Fuel Capacity | 40 gal |
