

MD 520N

The **MD 520N®** is a fast, agile, lightweight, turbine powered, all purpose helicopter. Advanced technology has been used in the design and construction of the aircraft, resulting in excellent speed capabilities, high payload-to-empty-weight ratio, passenger/crew safety and handling and performance capabilities.

The MD 520N® helicopter has a fully articulated five-bladed rotor system which provides excellent control and maneuverability characteristics. With its advanced NOTAR® anti-torque system, The MD 520N® is a member of an exclusive class of the safest, quietest helicopters in the world.
