

Sikorsky MH-60S SEAHAWK® Helicopter

Proven multi-mission maritime system

Sikorsky® MH-60S SEAHAWK®

Proven multi-mission maritime system

Since its introduction in the U.S. Navy in 2002, the MH-60S helicopter has proven to be an exceptionally reliable and versatile multi-mission aircraft. It has operated around the globe in the most demanding environments and demonstrated unmatched levels of safety and mission success.

Based on its battle-proven predecessors, the UH-60 BLACK HAWK utility helicopter and the U.S. Navy's multi-mission SH-60B SEAHAWK helicopter, the MH-60S provides state-of-the-art controls, displays and decision aids as well as a sophisticated, fully integrated sensor suite. Used by the U.S. Navy for Logistics, Troop Transport, Organic Airborne Mine Countermeasures (OAMCM) and Armed Helicopter (to include Combat Search and Rescue) missions, the MH-60S is an extremely capable and modern weapon system.

Characteristics

Maximum takeoff gross weight	23,500 lb	10,659 kg
Maximum useful load	9,070 lb	4,123 kg
Dash speed	153 kts	284 km/h
Approximate range	245 nm	453 km
Engines	Two T700-GE-401(C)	

Dimensions

Operating width	53 ft 8 in	16.4 m
Operating length	64 ft 10 in	19.8 m
Operating height	16 ft 0 in	4.9 m
Folded length	40 ft 11 in	12.5 m
Folded width	10 ft 8 in	3.3 m
Folded height	13 ft 3 in	4.1 m
Wheelbase	28 ft 11 in	8.8 m
Main rotor diameter	53 ft 8 in	16.4 m
Tail rotor diameter	11 ft 0 in	3.3 m
Cabin length	12 ft 7 in	3.8 m
Cabin width	6 ft 1 in	1.9 m
Cabin height	4 ft 5 in	1.3 m
