Sikorsky is transforming vertical flight

X2 Technology™

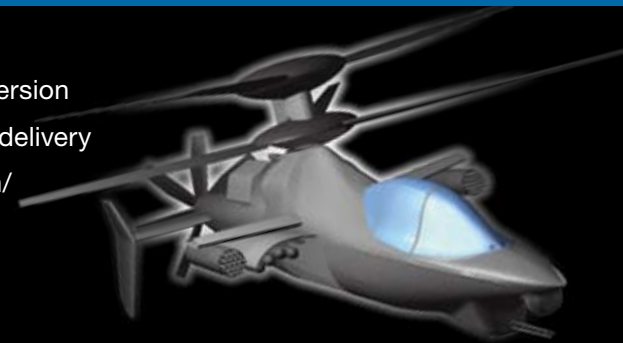

Sikorsky is transforming vertical flight

Integrated system of technologies enabling full spectrum performance

- Hover through high speeds
- No in-flight transition
- Extreme maneuverability

High Speed Attack

- 290 knots with no conversion
- Full envelope weapons delivery
- Level body acceleration/ deceleration

Commercial Intermediate

- 250 knot cruise speed
- Low seat mile costs
- Minimal external noise

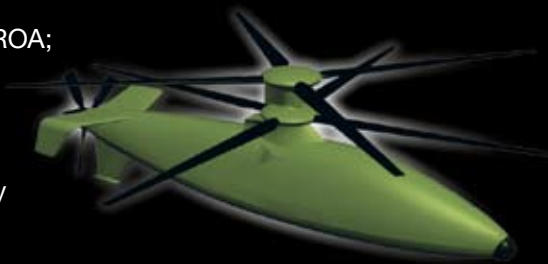

Joint Heavy Lift Crane

- 20 ton external lift
- Lowest life cycle costs
- Shipboard compatibility with existing assets

UAV

- 5+ hour endurance @ 110 nm ROA; 250 knot cruise to station
- Excellent search and stare capability
- Full envelope weapons delivery

Joint Heavy Lift High Speed Lifter

- 20 ton internal lift
- 250 knot cruise speed
- Shipboard capable
